It would petition the Board of Directors of the NH Electric Coop to change their bylaws to read that they will not only provide electrical service but will also provide and facilitate installation of fiber optic network capability for towns. They’ve also talked to some service providers (other than Consolidated Communications, AT&T and Spectrum) to provide just installer maintenance in order to move towards community owned networks versus corporate owned.

Tim Yee, Verizon consultant, conducted site walks at the Central Fire Station and Highway Garage in order to provide further information regarding the benefits of installing wireless towers at each location. The visits proved beneficial. The towers will improve cellular coverage and will also be usable for radio repeaters. Mr. Yee proposed two warrant articles to lease the town properties for the installation of towers. Selectman Marcussen and Chairman Albee were in agreement with adding an article to the warrant. Initially, Selectman Wood wished to table the article as he would like to obtain further vendor reference information. He also felt that the process was rushed and didn’t allow time for questions to be answered and lastly because there are many other topics to address at Town Meeting. After further discussion, all Selectmen agreed to add a single article to the warrant to grant the Selectmen general authority to lease town owned property. They agreed not to limit the article to specific parcels or vendors as proposed by Mr. Yee. Public hearings will be held before any action is made in regards to specific tower installation.

Chairman Albee moved to create a warrant article to read: To see if the Town will vote pursuant to RSA 41:11-a to authorize the Board of Selectmen to lease town-owned property for longer than one year and to further authorize the construction and installation of new personal wireless service facilities (PWSF) on Town-owned property, subject to obtaining all necessary approvals and subject to such other business terms determined by the Board of Selectmen to be in the best interests of the Town, including but not limited to an annual rental of market value with market rental escalators and adjustments and subject to the taxation authority of the Town for nongovernmental use of governmental land and to authorize the Board of Selectmen to take any action necessary to carry out this vote. The motion was seconded by Selectman Marcussen with all in favor. Selectman Wood wanted it added that he is only voting for this article as his primary concern is that Fire, Police and EMS officials currently have multiple communications limitations.

Chairman Albee moved to approve a revised warrant, seconded by Selectman Wood with all in favor.

The Selectmen reviewed a feasibility draft survey proposed by the Carroll County Broadband Initiative. The Selectmen reviewed a memo from Honorable David D. King regarding new electronically filed cases in the circuit court. Normandean Associates presented their final report of the 19 Mile Brook 2019 baseline studies. The Selectmen agreed to meet on 2/28/20 to complete job performance reviews. The Selectmen will also discuss at that time what they would
like for handouts at Town Meeting in regards to the Police Facility. The Conservation Commission will hold a Well Water Testing Event in March. Kits will be available for pickup at the Town Offices from 3/2-3/6 during regular office hours. Collection will be held 3/8 from 9:00 am-1:00 pm. Jack Parsons and Karen Koch will be asked to look into this.

We now have the emergency management 75 KW generator back from Milton Cat the final repair cost was $9,041.46. Which was $908.54 less then the final estimate. This repair was paid for from 2019 encumbered funds. It is now operating as it should.

This year beer festival and fishing derby weekend were uneventful for our department. We started out for a couple of calls reference ice rescues but were cancelled with the air boat prior to launching it.

We were notified by our furnace repair company that the Melvin Village Station furnace will need to be replaced in 2021. The estimate is approximately $6,000.00.

An agreement between the Lake’s region planning commission and the Town of Tuftonboro needs to be signed by the board of selectman for the hazard’s mitigation plan update. This secures LRPC to complete the plan and then the federal grant which is 75% Federal and 25% Town will be in effect. $7,500.00 grant and $2,500 from the town for a total of $10,000 we have budgeted $4,000.00 for this.
